

Nikolaos (Nikos) Triantafyllou

PHYSICIST, PHD CANDIDATE IN COMPUTATIONAL ASTROPHYSICS AND COSMOLOGY

Scuola Normale Superiore (SNS), Piazza dei Cavalieri 7, 56126, Pisa (PI), Italy

✉ Email: nikolaos.triantafyllou@sns.it | 🏠 Website | 🐙 GitHub | 🔗 LinkedIn | 🎓 Google Scholar | 🧑 ORCID

Research Interests

Large-scale structure, 21cm cosmology, machine learning, Bayesian statistics, model misspecification, bias quantification

First author Publications

A full publication list can be found [here](#)

IN PREPARATION

TILING I: Field-level Bayesian Reconstruction of Cosmological Initial Conditions during the Epoch of Reionization

N. Triantafyllou, A. Mesinger, S. Murray, S. Gagnon-Hartman

TILING II: Inferring the build-up of Reionization and unseen Galaxies

N. Triantafyllou, A. Mesinger

21cmVAULT: Multi-tracer Inference of Galaxy Properties and an Extensive Database for the First Billion Years of the Universe

N. Triantafyllou, A. Mesinger

PUBLISHED

Searching for a Signature of Turnaround in Galaxy Clusters with Convolutional Neural Networks ([arXiv](#))

N. Triantafyllou, G. Korkidis, V. Pavlidou, P. Bonfini

Education

Scuola Normale Superiore

Pisa, Italy

PHD IN COMPUTATIONAL ASTROPHYSICS AND COSMOLOGY

Nov. 2023 - Nov. 2027 (Est.)

- Advisor: Prof. A. Mesinger

University of Crete

Heraklion, Greece

M.SC. IN ADVANCED PHYSICS (SPECIALIZATION: ASTROPHYSICS) (HIGHEST DISTINCTION)

Sept. 2022 - June 2023

B.SC. IN PHYSICS (TOP 3% OF DEPARTMENTAL HISTORY)

Sept. 2018 - Sept 2022

- Advisor: Prof. V. Pavlidou

Research Experience

Scuola Normale Superiore

Pisa, Italy

SUPERVISOR: PROF. ANDREI MESINGER

2023 - Present

- Description: Research on Large-scale structure and Cosmology for the EoR. Using **bayesian** techniques (Posterior Density Estimation, Neural Ratio Estimation, Diffusion Models) for **field-level, multi-tracer** inference of the **primordial density field** and galaxy properties at $z > 5$.

University of Crete and IA FORTH

Heraklion, Greece

SUPERVISOR: PROF. VASILIKI PAVLIDOU

2021 - 2023

- Description: Research on Large-scale structure and Cosmology. Used deep (NNs, **CNNs**, GraphNNs) and shallow learning to probe the **turnaround radius** on the plane of the sky based on mass and line-of-sight velocity simulated data at $z < 1$ to constrain cosmological parameters.

International Conferences

Presentations can be found [here](#). For all conferences, see [here](#).

2026 SKA CD/EoR Science Team Meeting

SPEAKER

Belgrade, Serbia

September 2026

International Conference on Machine Learning for Astrophysics (ML4ASTRO3)

SPEAKER

Valetta, Malta

September 2026

A New Era in Astrophysics: preparing for early science with the SKAO

SPEAKER

Görlitz, Germany

June 2025

Simulation-Based Inference for Galaxy Evolution

SPEAKER

Bristol, UK

May 2025

Grants, Fellowships and Awards

Apr. 2026	Compute Time Allocation for AI & Machine Learning project: "Effect of field-level-conditioning on cosmological and astrophysical inferences", LEONARDO HPC/CINECA	95,000 standard hours
Sept. 2025	Compute Time Allocation and a physical Nvidia L4 GPU, E4 Computer Engineering	4-month HPC access
Sept. 2025	First place of poster session, E4 Computer Engineering	Nvidia L4 GPU
Jan. 2025	Compute Time Allocation for AI & Machine Learning project: "Reconstruction the Initial Conditions of the Universe using Diffusion Neural Networks", LEONARDO HPC/CINECA	80,000 standard hours
Oct. 2023	4-year PhD fully-funded scholarship, SNS/PNRR	
2018-2019	"Chrysanthos and Anastasia Karidis" Bequest Scholarship,	

Teaching Experience

Spring 2025	PhD-level course teaching: Structure Formation in the Early Universe, Creation of a hands-on tutorial for cosmological initial conditions	Pisa, Italy
2020 - 2022	Teaching Assistant, 3 labs (Advanced Physics, Optics & Electromagnetism; 6 months each)	Heraklion, Greece

Skills

Programming & Software

Working with: Python, $\LaTeX$, HPC systems, database creation, parallelization

Familiar with: C, C++, MATLAB, website building

Languages

English (fluent), Italian (conversational, B2), Greek (native)

Academic

Creativity, problem-solving, data science, teaching, report & proposal writing, organizing group meetings/journal clubs, presentation & communication skills,

Academic Service & Broader Impacts

AstroVisio (INAF, Design Group Italia)

Project that aims to develop an innovative virtual reality tool to help researchers visualize astrophysical data

Contribution: Explaining the challenges that astrophysicists face in visualizing data, during the very first and intermediate stages of the project. Provided astrophysical data from simulations. Created a video demo for the possible use cases of Astrovisio for a relevant presentation of the company.

Other Interests _____

Music (guitar playing, singing, lyric writing), philosophy, art, movies, road trips, swimming, basketball, wine/beer tastings, bars/pubs
